MUHAMMAD ZUBAIR

+92 3411269075 zubairsaleem1210@gmail.com Karachi, Pakistan linkedin.com/in/muhammadzubair0

SUMMARY

Experienced in developing responsive, high-performance web and cross-platform mobile applications with a strong emphasis on user experience, code quality, and scalability. Proficient in modern frontend frameworks, state management patterns, RESTful & real-time API integrations, and performance optimization. Passionate about building intuitive, maintainable applications using cutting-edge technologies.

SKILLS

Programming Languages: JavaScript, TypeScript.
Frontend: React.js, React Native, Next.js, Vue.js, Nuxt.js.
Backend: Node.js, Express.js.
State Management: Vuex, Redux, Zustand.
Databases: MongoDB, Firebase.

WORK EXPERIENCE

DIGITLI *Oct 2021 – Present*

SENIOR SOFTWARE ENGINEER

Strongest expertise in React, Next.js, Vue.js & Nuxt.js specializing in building responsive, SEO-optimized, high-performance web applications, and maintainable code.

PROJECTS

Ticketbox.mu Ticketing Platform (Flights, Events, Hotels, E-vouchers)

- High-performance booking system using **Vue.js** → later migrated to **Nuxt.js.**
- Managed complex booking flows, availability checks, and payment integrations with **Vuex.**
- Improved SEO, SSR performance, and page load speed through successful **Vue → Nuxt migration.**

Mofleet.mu Fleet Management System

- Developed a fleet management application with role-based access control.
- Implemented company, department, and user role hierarchies.
- Created responsive dashboards for fleet operators and administrators.

Standardtea.com E-commerce Platform (Next.js).

- Developed and maintained a modern e-commerce website using **Next.js.**

Milanfoods.com Food E-commerce Platform (Next.js + Strapi).

- Built and contributed to a multi-language online food ordering & delivery platform.
- Integrated **Strapi** headless CMS for content and product management.
- Handled localization (i18n), dynamic routing, and SEO optimization.

Txty Real-time Messaging Mobile App (React Native + Expo).

- Developed a full-featured text base chat application with real-time messaging, push notifications.
- Implemented **Firebase Firestore** for data persistence and real-time sync.
- Managed complex application state and offline capabilities using **Redux Thunk** + **Redux Persist.**

Order Booker Sales & Order Management Mobile App (React Native CLI).

- Built a sales application used by sales teams to place orders, view inventory, and track customers.
- Utilized **NativeBase** for consistent UI components across iOS and Android.
- Implemented robust state persistence with **Redux Thunk**, **Redux Persist**, and **AsyncStorage.**

TBX Scanner Ticket Scanning Mobile App (Expo).

- Developed a mobile application with multi-role authentication (Admin, Promoter, User).
- Implemented QR/Barcode scanning for real-time ticket validation.
- Enabled live tracking of scanned tickets to monitor event attendance and usage.
- Displayed ticket details based on scanned codes for quick verification.
- Optimized performance with efficient API integration and state management.

SYSBORG *Jan 2021 – Sep 2021*

FRONTEND DEVELOPER

Experienced in building modern, scalable web applications using React.js with a focus on reusable components, efficient data handling, and clean, maintainable code. Skilled in API integration, data fetching, error handling, and optimizing user experience across web applications.

PROJECTS

Online Qur'an Tutor Platform

- Developed a responsive web application for online Qur'an tutoring services.
- Built reusable UI components to ensure scalability and maintainability.
- Built reusable UI components to ensure scalability and maintainability.

Parking Management Application

- Developed a role-based parking management system.
- Implemented structured access control for different user types.
- Created responsive dashboards for monitoring and managing parking operations.

Rays MTB Mobile Application

- Developed to a mobile-based management system with a focus on usability and performance.
- Developed reusable components and optimized API integrations.
- Created responsive dashboards for monitoring and managing parking operations.
